

1	Replace the project title
	<title>Animate to a Viewpoint</title>
2	Add the code for animating to 2nd viewpoint from the current view on map
	<pre> mySceneView.on("click", function() {     myViewPoint2 = new Viewpoint ({         camera: {             position: [-117.15045, 32.70134, 500],             tilt: 80,             heading: 110         },     });     mySceneView.goTo(myViewPoint2); }); </pre>
