1	Replace the project title
	<title>Retrieve MapView Scale and Spatial Reference</title>
2	Remove the code for alert view in the script tag, add code to the script tags for adding MapView on-Click listener to retrieve mapView scale, spatial reference wkid, and display the data to an alert view.

	myMapView.on("click", function() {
	
	    alert(" the map scale is: " + myMapView.scale + "\n the map spatial reference wkid is: " + myMapView.spatialReference.wkid);
	
	        });
