1	Replace the project title
	`<title>`Set a Viewpoint`</title>`
2	Add Point and View point modules and functions
	```<script> var myMap, mySceneView; require(["esri/Map", "esri/geometry/Point", "esri/Viewpoint", "esri/views/SceneView", "dojo/domReady!"], function(Map, Point, Viewpoint, SceneView) {```
3	Add code for creating a point with longitude, latitude, and elevation properties.
	```var myPoint = new Point ({ longitude:-122.4479, latitude:37.7531, z: 1000 });```
4	Add code for create a viewpoint with a camera property
	```var myViewPoint = new Viewpoint ({ camera: { position: myPoint, tilt: 80, heading: 330 }, });```
5	Set the SceneView viewpoint with myViewPoint
	```mySceneView = new SceneView({ container: "map1", map: myMap, viewpoint: myViewPoint });```
